Germany Arizona Clean Tech Lunch Seminar  
Business Opportunities in Eastern Germany in Times of the 
Energy Transition (Energiewende)

Thursday, January 28, 2016 | 11:30 am – 2:00 pm | Sheraton Hotel Downtown Phoenix

INVITATION

While enjoying an exclusive lunch, industry experts from Germany and Arizona will give you insights on the current status, future trends and investment opportunities in the U.S. and German energy market.

Opportunities in the German energy market have experienced a massive boost in recent years. This is due in large part to Germany's ambitious energy transition (Energiewende). Renewable energy sources currently produce around 30% of all electricity consumed in Germany and this share is to be increased to 80% by 2050. Solar power and onshore- and offshore wind power will be the main pillars of renewable energy production. The integration of fluctuating renewable energies into the electricity grid demands innovative solutions and major investment in the transmission grid. In addition, Germany is looking to drastically reduce overall energy consumption, so there are also many opportunities for companies providing energy efficiency solutions.

Come hear how your company can play a role in Germany's Energiewende.

Receive first-hand information on how Germany, in particular Eastern Germany, has made it one of the most attractive locations for business in Europe over the past two decades. Learn how your business can profit from the promising investment and market potential in this region.

We look forward to welcoming you in Phoenix!
