Innovations Poised to Transform Arizona’s Transportation and Workforce

This year’s focus will be on the innovations and disruptions poised to transform Arizona’s workforce and transportation sectors. Some people call automation and artificial intelligence at our workplace and on our roads “disruptors,” while others speak of “opportunities” for a new economy and training our talent. What’s important is that we understand, anticipate, and prepare for cutting-edge and fundamental changes to our economy, infrastructure, and tax base.

Join us for a preview of Arizona’s not-too-distant future.

Speakers and panelists:
- Kirk Adams – Chief of Staff, Office of the Governor
- Eric Anderson – Transportation Director, Maricopa Association of Governments
- Diana Bowman – Associate Professor, ASU College of Law
- Jaime Casap – Education Evangelist, Google
- Carlos Contreras – Regional Public Affairs Director, Intel Corporation
- Rena Davis – Public Policy Manager, Lyft
- Megan Garcia – Senior Fellow and Director, New America Foundation
- Brian David Johnson – Futurist in Residence and Professor, ASU
- Jonathan Koppell – Dean, College of Public Service and Community Solutions, ASU
- Orly Lobel – Author and Professor of Law, University of San Diego
- Duke Reiter – Senior Advisor to ASU President Michael Crow
- Luke Tate – Asst Vice President and Executive Director of Opportunity Initiatives, ASU

Registration begins at 7:30AM • Join us early for a network breakfast • Program begins at 8:00AM

Keynote Speaker

Brian David Johnson

The future is Brian David Johnson’s business. Currently the Futurist in Residence at Arizona State University’s Center for Science and the Imagination, he works with organizations to develop an actionable 10- to 15-year vision and define what it will feel like in the years ahead. Future-casting uses ethno-graphic field studies, technology research, cultural history, trend data, global interviews and even science fiction to provide a pragmatic map. He has worked with governments, trade organizations, start-ups and multi-national corporations to not only help envision their future, but specify the steps needed to get there. He is a professor in ASU’s School for the Future of Innovation in Society and Director of the Threatcasting Lab.
